Dr Elaine Ingham

Dr. Ingham, President of Soil Foodweb, Inc and Board Member of the Sustainable Studies Institute, is an energetic, easy-to-understand speaker who explains what life in the soil is all about. Elaine offers a way forward for sustainable farming; a way of improving soils we work with now, and a way to keep soils in this healthier state without damaging any other eco-system. It is exciting that a speaker with such a depth of knowledge and dynamic presentation style, who is respected the world over as a leader in research of the soil food web is sharing this information with us.

Flowerfield Enterprises

Flowerfield Enterprises was founded in 1976 by Mary Appelhof, world famous author of “Worms Eat My Garbage.” Since that time we have helped thousands of institutions and individuals with their worm composting programs. In the past few years we have taken the next step forward. After studying with Dr. Elaine Ingham, we have established a comprehensive program to produce high quality lab-tested compost teas and extracts, to apply these products efficiently and economically, and to monitor the progress using proven scientific methods. Flowerfield Enterprises is currently consulting with many local lakeside communities to help them with water quality compliance issues, and with local farms to help in their transition to organic production. Our products and our consulting and laboratory services are here for you, the homeowner, the farmer, the landscaper, the gardener now and in the years to come.

Flowerfield Enterprises

Welcomes

Dr. Elaine Ingham
Sustainable Studies Institute
Corvallis, Oregon

A one day seminar

Bringing Soil Back to Health!
A Lower Cost Approach

Wednesday, January 14, 2009
9am to 5pm
Riviera Theatre
58 N. Main Street
Three Rivers, MI
“Welcome to the world of life in the soil.”

Dr. Elaine Ingham

A biological approach to building soil, increasing organic matter and nutrient availability to optimum levels without resorting to toxic chemicals or supplements

Flowerfield Enterprises, a Kalamazoo area institution for over 30 years, will be working with Dr. Ingham as your local source for ongoing practical economic guidance in these areas:

- **Commodity Crops**
- **Row Crops**
- **Pasture Systems**
- **Fruit Production**
- **Orchards**
- **Vineyards**
- **Residential Lawns**
- **Vegetable/Flower Gardens**
- **Turf Systems**
- **Athletic Fields**
- **Golf Courses**
- **Greenhouses**
- **Water Quality Improvement**
- **Erosion Control**
- **Bioremediation**
- **Compost Production**
- **Making a Successful Transition to Organic Growing**

Join us for a fascinating and highly entertaining look at the world below the surface of the soil through the eyes of world-renowned soil scientist Dr. Elaine Ingham. Dr. Ingham has established the Sustainable Studies Institute in Corvallis, Oregon as well as Soil Foodweb Labs throughout the world to develop healthier, safer standards for all forms of plant production. Her observations and suggestions are enlightening and important.

Flowerfield Enterprises is proud to be working with Dr. Ingham on projects here in southwest Michigan and we are happy to be hosting her 1 day seminar and workshop at the newly restored Riviera Theatre in Three Rivers, Michigan on Wednesday, January 14, 2009.
